Work Experience	Squarepoint Capital: Electronic Execution <i>Desk Quant Analyst</i>	London, United Kingdom <i>June 2024 - Present</i>
	- Working within the Execution team to help manage the firm's execution strategies within all asset classes the firm trades. - I work on a variety of tasks, including developing tools to monitor and conduct research, doing research for optimizing trading costs, integrating new features into existing systems to meet evolving needs, and monitoring strategies during market hours. Using Python, Q/Kdb+ and C++.	
	OCaml.org: via Outreachy <i>Software Engineering Intern</i>	Remote <i>Summer 2024</i>
	- Designed and implemented a unified framework using functional programming to execute OCaml exercise sets across platforms (Jupyter, Learn-OCaml, GitHub Codespaces, Replit), enhancing accessibility and streamlining workflows. Used OCaml, Bash and Python.	
	Amazon: Alexa AI <i>Software Engineering Intern</i>	Cambridge, United Kingdom <i>Summer 2023</i>
	- Worked on the Natural Language Understanding (NLU) team in enhancing workflow efficiency through automation of Python code quality checks and integration of tools in the CI/CD Pipeline. - Crafted design documents, owned project decisions, and collaborated on tool development for scientists in the team as project stakeholders. Used Java and Python.	
	Google: Google Cloud <i>Software Engineering Intern</i>	Bangalore, India <i>Summer 2022</i>
	- Assisted in the transition from Rhino to V8 engine within the Google Cloud Apps Script team. - Took ownership in the development of a feature using Java on the backend platform, to resolve bottlenecks and enhance user script performance by a significant 20% during the transition.	
	Google: Google Ads <i>Software Engineering Intern</i>	Bangalore, India <i>Summer 2021</i>
	- Engineered a backend pipeline in Java for Ads Storefront pages and conducted research on a unique language translation task to enhance user experience for Next Billion Users (NBU). - Utilized Python and SQL for secure, privacy-compliant data extraction and anonymization.	
Projects*	Impact of Dos Attacks on 5G Sliced Networks <i>Advisor: Prof. Vireshwar Kumar, IIT Delhi</i>	<i>2023-24</i>
	Master's Project: Developed and implemented a advanced 5G network slicing framework using Open5GS and UERANSIM. Designed and integrated security mechanisms to mitigate DoS attacks, studying techniques for dynamic slice management.	
	CovEd India: Educational Social Initiative <i>Core Team Lead, Co-founder</i>	<i>Summer 2020</i>
	Linked 800+ low-resource K-12 students with mentors across India within three months of pandemic onset, partnering with Khan Academy and leading a team of 20 volunteers.	
Education	Indian Institute of Technology Delhi	8.3/10
	B.Tech + M.Tech, Computer Science and Engineering	May 2024
